

I make intricate systems feel simple and intuitive.

User Experience Designer with 7+ years of experience designing internal tools and optimising complex workflows. My approach is grounded in research, design thinking, and continuous iteration. With a background in service design and a strong interest in how people interact with systems, I bring clarity and empathy to messy problems and thrive in collaborative, cross-functional teams.

Beyond my core design work, I lead the UK Neurodiversity Charter at Zynga. In my spare time, I enjoy running, playing cosy games, and diving into D&D campaigns - anything that blends creative problem-solving with storytelling.

Experience

Jan 2023 - Present · Senior UX Designer · Zynga

- Conduct user research across projects, establishing findings into problem statements that changed how teams worked, effectively reducing handover time and unnecessary iteration.
- Reduced post-development review effort by prototyping directly in code for complex organisational tools, making design intent clearer to engineering than static mockup handoffs.
- Raised the standard and appreciation of research-led practice across the design team by authoring shared resources: user archetype definitions, design spec templates, and research guidelines.
- Turned cross-functional relationships into trusted partnerships by facilitating design reviews with product and engineering, consistently finding solutions that met technical constraints without compromising on user needs.
- Raised collective design quality across teams by mentoring junior designers through critiques and knowledge-sharing sessions.
- Lead the UK Neurodiversity Charter at Zynga, driving awareness of inclusive practices across the business.

Aug 2022 - Jan 2023 · Senior UX Designer · NaturalMotion

- Maintained quality from brief through to handoff while managing multiple simultaneous features, taking full end-to-end UX ownership including design systems, user flows, and wireframes.
- Improved user engagement by applying analytics and usability testing to iterate designs, maintaining accessibility standards throughout.
- Shipped cohesive cross-platform experiences by collaborating with PMs, artists, and engineers, applying platform-specific interaction patterns across touchpoints.

Transferred internally to Zynga in January 2023

Aug 2020 - Aug 2022 · UX Designer · NaturalMotion

- Improved usability across platforms by grounding design in interaction design and HCI principles.
- Consistently balanced user needs with business constraints, translating feature specs into high-quality design solutions under tight timelines.
- Maintained a data-informed design practice by incorporating research insights and stakeholder feedback into iterative design across multi-disciplinary projects.

Aug 2017 - Jul 2019 · Junior Product Designer · Inspiral Design Ltd

- Delivered brand identity and digital materials for multiple client accounts simultaneously, managing each from initial concept through to final delivery.
- Solved varied client briefs across print campaigns and digital assets, applying design thinking to meet both creative and commercial objectives.

Education**Masters in Service Design: Distinction**

2019 - 2020 · Brunel University

Bachelors in Digital Design: First Class Honours

2015 - 2019 · Brunel University
